

**William R. Godfrey**

**President and Director of Programs**

William Godfrey is the President of Environic Foundation International (EFI), a 501 (c) (3) non-profit research and education foundation specializing in the development and delivery of sustainability education. Mr. Godfrey has developed and lead EFI's programs for higher education and business in the US and Africa.

Before EFI, Mr. Godfrey was a senior architect with the global design firm LEO A. DALY, where he was responsible for projects ranging from individual buildings to coastal lagoons and new cities in the U.S., the Middle East, Pacific Islands and China.

His work in educational program development, architecture, engineering, and planning have received international and national awards from the United Nations Environment Programme, the African Association of Universities, the South African Development Commission, the United Nations University, the American Institute of Architects, The American Council of Civil Engineers, and the U. S. Department of Defense.
